Core values	CONSUMERS
Inspiration	2012 'A cushion on a radiator'
Take a seat on the heat	Hotsofa transforms an existing heating element into a comfortable seating area. It's the only sofa that creates space instead of taking it up!
Social wonder	Hotsofa creates a warm gathering spot beside the window. A new seating area that takes up no room!
Multifunctional	The ideal spare seat for unexpected guests, Hotsofa can thus easily be moved and fits with its sitting height of 47 cm also perfectly to the dining table
Customize to size	Standard lengths of 120, 200, 240 and 300 cm, precisely tailor-made up to a length of 500 cm. Fits over a 37 cm high radiator.
Premium materials	The sofa is upholstered with premium woolen Kvadrat fabrics. The legs are stainless steel with a high gloss polish.
Create your own Hotsofa	Use your personal inspiration and creativity to make your own Hotsofa design with unique fabrics and prints!
PROJECTS	
Inside out	Officesbuildings, hotels, schools, museums, airports .. Hotsofa brings people to sit by the window, connecting interior and exterior, bringing life to the plinth of the building.
Modular design	Hotsofas can be fitted facing either direction.
Customised projects	Project-specific refinements such as floor mounting and custom fabrics are also possible.
Saves costs	Hotsofa can extend the life of unsightly radiators, thus saving costs and contributing to sustainability.
ENVIRONMENT	
Forever warm	A sophisticated sizing process results in minimal losses from cutting and sawing during production of the upholstered parts. There is a twenty percent discount for reupholstery. Unwanted sofas will be collected for free and the parts will be reused. In this way Hotsofa contributes to a sustainable economy.
